FOUNDER

VIJAY KUMAR

I'm **Vijay Kumar**, from Bihar. Growing up, I saw countless talented people spend years preparing for government jobs—opportunities that are limited by nature. Even when someone succeeds, it often becomes a personal achievement, not a transformation for the community or the state. I chose a different path. From the beginning, I was clear that I wanted to build something in computers. I completed my 10th from my village, 12th from Chapra, then pursued a Diploma in Software Engineering from BELTRON while also enrolling in a BA. Later, I moved to Delhi for a two-year Advanced Diploma in IT from NIIT and began my career in the IT industry. After a decade of hands-on industry experience, I pursued an MBA from IIT Chicago. That's when a simple thought changed everything: If I could build a career in technology without privilege or a big-city start, why can't students from rural India do the same? That belief led to EduGaon—a mission to train rural students in software engineering through practical skills, real projects, and industry exposure. EduGaon exists to prove that talent is everywhere; opportunity should be too.

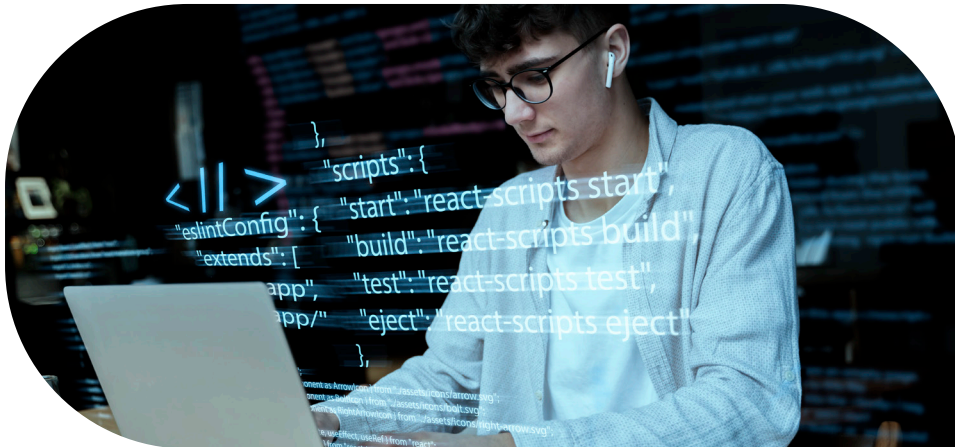

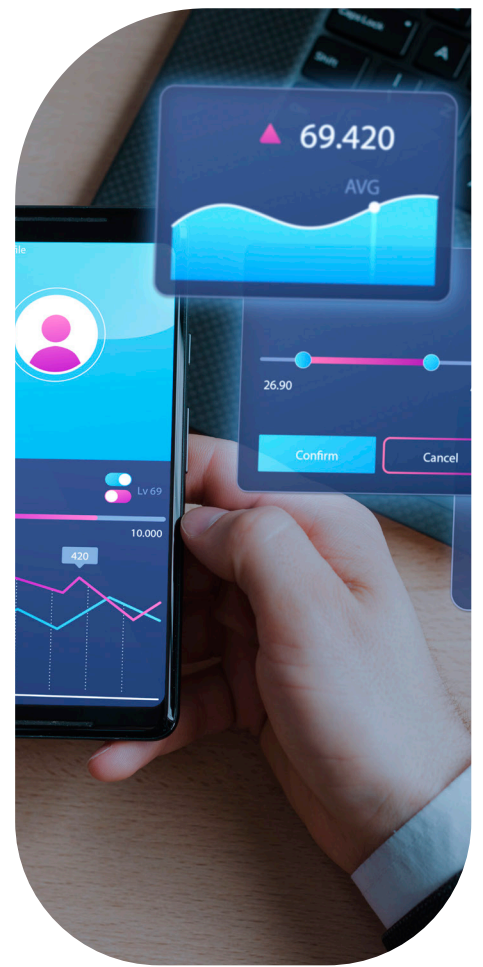

RAHUL RAJ

CO-FOUNDER

I am **Rahul Raj** from Bihar and I grew up in Patna. My father was a government employee and I don't want to become a government employee and my father also did not force me to do so. From childhood I always ask so many questions about anything when I saw anything my mind always imagines so many things and always ask so many questions some questions answered by my parents and some remain unanswered but the question was still haunting my mind always. I was also a very naughty child in my family so I always listen to most of my neighbours and relatives that they will do nothing in life but I was sure that opinions do not matter for me my self-confidence and belief was very clear that I want to do something extra from the normal students so I decided to do BCA from Patna and when I studied there I found that the colleges or institutes only focus on the academic part after I completed my BCA I also moved to Delhi and I learned there that syllabus and bookish knowledge is important but the real industry-oriented knowledge is so much worthier than the books. So I decided to found EduGaon to avail technology for any students who can learn technology with real industry-experienced faculties and professionals.

So I decided to provide technology to the rural students who can never imagine such a kind of learning because of cost.

- Web Design and Development
- UI/UX
- MERN
- Flutter Development
- Python for Data Science
- MERN Stack

YEAR WISE BREAK-UP OF COURSE FEE

Year	Year	Founding Batch
Year 1	₹ 2,50,000	₹ 1,40,000
Year 2	₹ 2,00,000	₹ 1,30,000

STUDENT'S REVIEWS

NANDANI RAWAT (FROM SIWAN)

Main Siwan se Edugaon isliye aayi kyunki yahan mujhe apna career clearly dikhai diya. Practical training aur proper guidance ke saath mujhe lagta hai Edugaon mere future ke liye best hai.

Transforming Skills into Dream Placements.

ASUTOSH KUMAR (FROM AFFOUR NAGRA)

Along with UPSC preparation, he is passionate about gaining technical skills. With a strong interest in coding and continuous learning, he chose EduGaon to upgrade his knowledge.

Transforming Skills into Dream Placements.

SURAJ KUMARYADAV (CLASS 11TH, BANIYAPUR)

Mujhe coding me interest hai aur 11th class me hote hue maine Edugaon join kiya kyunki yahan basics se advanced tak coding sikhai jaati hai. Mujhe lagta hai Edugaon mere coding career ke liye best place hai.

Transforming Skills into Dream Placements.

MANISH KUMAR (FROM KARNAPURA)

He has a strong interest in designing and enjoys continuously learning new technologies. He chose EduGaon as it is the only IT institute in Bihar that provides practical, industry-oriented training.

Transforming Skills into Dream Placements.
